## Eco-Rax

Eco-Rax is a robust boltless heavy-duty hand loaded shelving system consisting of powder coated blue uprights, galvanised frame beams and ties, chipboard shelves and black plastic feet.

Its design allows for quick assembly without the need for any special tools as the precision manufactured components are simply knocked into place with a soft-faced mallet.

The upright is pierced to offer full adjustability at 35mm pitches in the height.

Eco-Rax is suitable for a wide range of applications in the office, workshop, warehouse and home.

Heavy duty shelves have a capacity of 265Kg (UDL)  
Complete bays are supplied with 5 shelves per bay.

### Eco-Rax Standard Bays

Description	H x W x D (mm)	Shelf Capacity (Kg)	Order Ref	Price (Each)
Eco-Rax Standard Bay c/w 5 Chipboard Shelves	1800 x 900 x 450	265	440945	£67.00

## Eco-Rax - Space Bin Container Kits

An ideal storage solution for storage of larger products or multiple storage of bulk items. Large open fronted bins allows easy access for stored products.

Containers are both stackable and nestable when not in use.

- Fully adjustable
- Bolt-free system available pre-kitted
- Ideal for workshops, offices, warehouse and home
- All components are lightweight
- Complete with 5 chipboard shelves
- Shelf capacity of 265Kg (UDL)
- Shelf size: W 1200mm x D 450mm

Please refer to page 36 for full details on container sizes/capacities.

441245/SB

Description	H x W x D (mm)	Shelf Capacity (Kg)	Order Ref	Price (Each)
Eco-Rax Standard Bay c/w 8 x Space Bin Containers	1800 x 1200 x 450	265	441245/SB	£172.00

## Eco-Rax - Multi-Functional Container Kits

An alternative storage system which uses containers complete with lids, keeping stored items dust free.

Ideal in schools, offices, workshops, garages etc.

Different kit options are available using containers with single colour or mixed colour (1 x red, blue, green and yellow) lids. The mixed colour option is ideal for product segregation.

Containers are both stackable and nestable when not in use.

- Fully adjustable
- Bolt-free system available pre-kitted
- Ideal for workshops, offices, warehouse and home
- All components are lightweight
- Complete with 5 chipboard shelves
- Shelf capacity of 265Kg (UDL)
- Shelf size: W 900mm x D 450mm

Please refer to page 36 for full details on container sizes/capacities.

Eco-Rax Standard Bay c/w 12 x 40Ltr Storemaster Containers	1800 x 1200 x 450	265	441245/SM40	£262.00

## Toprax - Bolt Free Adjustable Shelving

Toprax is a high quality, fully adjustable bolt-free shelving system, requiring no special fixings. It combines the strength necessary to meet the specifications for commercial and industrial storage applications, whilst the unpierced face of the uprights and beams provide the style and elegance required for the office environment.

Clean, fully tooled components ensure the complete absence of sharp edges to safeguard you and your goods from damage.

The unique design of Toprax allows clear, unlimited entry, as there are no cross braces or gussets to restrict the loading of shelves or the selection of products.

The system can incorporate Topstore bins and is capable of being fitted with accessories to make the system suitable for garment hanging. The bays can be clad on the sides and rear with mesh or steel panels to make this one of the most flexible systems available.

A wide choice of frames and shelves are available. Shelves are fully adjustable on 50mm (2") centres and bays can be extended as required to cater for fluctuating stock and change in products.

For added convenience and faster installation, all units are supplied with full instructions for self-assembly.

Uprights are finished epoxy powder coated blue, beams and ties are epoxy powder coated silver/grey and shelves are galvanised as standard (other colours are available upon request, refer to choice on page 49).

Standard Single Bay + Extension Bay

Double Bay

# Toprax - Bolt Free Adjustable Shelving

Garment Hanging

## Flexibility

The flexibility, strength and stability of Toprax enables the system to be fitted with a range of accessories for varying storage requirements.

## Garment Hanging

Using standard frame ties with specially designed brackets, and two diameters of hanging rail for differing sizes of hangers. It is an ideal way for the storage of clothing and other garments.

The system is totally flexible and can be fully adjusted to accommodate additional levels for fluctuating storage requirements.

## Cable Reel Dispensing

Using the same principle as Garment Hanging, the Toprax Cable Reel System is an extremely effective way of storing cable reels and offers quick dispensing with minimum of effort. Replacing empty cable reels is quick and easy as the cable reel support can simply be lifted from the bracket enabling quick changeover.

The special design of the hanging rail bracket allows full adjustment when unloaded. When loaded, the support bar can be firmly secured in place preventing unnecessary movement.

The system is totally flexible and can be fully adjusted to accommodate additional levels for fluctuating storage requirements.

## Cladding

Toprax also offers the option for rear and side cladding. Available in either a 50 x 50mm mesh grid or galvanised steel sheet, for effective segregation of bays.

Cable Reel Dispensing

Cladding – Mesh Sides / Steel Rear

Upright Colour Options

This option will only be considered on higher volume orders. Please check with the Sales Department.

# Toprax - Garment Hanging

An ideal way for the storage of clothing and other garments. Two options (as shown below) are available, the first option is using standard frame ties with specially designed brackets and 2 hanging rails (32mm diameter), the second option simply uses the frame beams. Compatible with different sized hangers.

The system is totally flexible and can be fully adjusted to accommodate different levels for fluctuating storage requirements.

Max load capacity: For hanging rail (Option 1) - 60Kg(UDL)per rail  
 For beam hanging (Option 2) - 100Kg(UDL)per beam  
 (Ensure loads are evenly distributed along the width and depths of bays)

Floor fixing is required where shelving bays exceed a height to depth ratio of 4:1

# Toprax - Longspan Shelves

Toprax can also be used as a Longspan shelving system for the storage of longer/larger goods where a standard shelving system would not be suitable.

Based upon the standard Toprax design, it is a cost saving alternative to conventional fully braced longspan systems with a comparable load capacity.

Toprax longspan can be supplied with galvanised steel or chipboard shelves.

- Shelving bays available H 1500mm / H 2000mm
- Shelf sizes W 1740mm x D 290mm / D 440mm
- Available with either 3 or 4 shelf versions

Longspan Bay

For added stability of the beams a Beam Tie is also available.

Beam Tie, Shelf Stop + Steel Shelf

Toprax also offers unrivalled versatility as you can mix standard bays with longspan bays as shown, to offer multiple options dependant upon the type of goods to be stored.

Floor fixing is required where shelving bays exceed a height to depth ratio of 4:1

## Eclipse - Chrome Wire Shelving

Eclipse wire shelving is suitable for restaurants, hotels, retail outlets, hospitals, offices, factories, educational departments and the home.

Bays can be made suitable for the electronics industry with the addition of conductive components (please enquire).

Assembles in minutes with no specialist tools required.

Open wire shelves for greater visibility and airflow with adjustability at 25mm pitches.

Heavy duty with a 300Kg shelf load capacity (UDL).

Units can be customised with a wide range of accessories (please enquire) and different finishes from Chrome for dry storage areas to epoxy powder coated Perma Plus antibacterial finish for cold, damp environments such as cold rooms or freezers.

# Plastic Plus Shelving

Heavy duty steel plastic coated shelving.

Combines the corrosion resistant qualities of plastic with the strength of steel. Shelf panels are guaranteed for life against corrosion.

- Designed to carry up to 360Kg per shelf (UDL)
- Temperature resistant from -29 to 88°C
- Removable solid or vented dishwasher friendly shelf panels
- Adjustable post feet for uneven surfaces
- Also available as mobile units (see opposite page for castor codes/prices)
- Other heights and shelf sizes are also available (please enquire)

**Complies with MoD Specification 42  
Alternative to Stainless Steel  
(additional components required - please enquire)**

## Longspan Shelving

Longspan shelving is perfectly designed to meet all types of requirements for storing medium weight items of different sizes. It is very quick and easy to assemble.

A wide range of frames, beams and components make this longspan shelving system highly versatile, suitable for storing most types of products from small components to heavy cartons.

Frames are a fully bolted construction consisting of epoxy powder coated blue uprights with galvanised bracings and beams are epoxy powder coated orange as standard, however, other colours are available.

All chipboard shelves are 25mm thick, quality P2 grade to increase the weight loading capabilities.

## Longspan Kits

## Longspan Shelving - Euro Container Kits

323021S/EC4

323021S/EC6

Longspan bays kitted with two sizes of Euro Container to give a flexible solution for storage of small to medium sized goods or bulk items which require segregation or for ease of storage and forward transport.

Containers are stackable.

Please refer to page 37 for bin sizes/capacities.

		2400mm	505
		2700mm	430

## Mobile Shelving Bases

A mobile shelving system is a totally efficient space saving concept that allows for cost savings across retail, industry and commerce.

With a mobile shelving system you can almost double your existing storage capacity or regain almost 50% of the space already used by conventional static shelving. In some cases this can remove the need to relocate an entire organisation.

The most common system uses a hand wheel to move the mobile shelving along the tracks to gain access to a specific aisle.

The smooth and controlled operation of the mobile units ensure operator safety.

The system can be installed almost anywhere including raised access floors and mezzanine floors.

Without doubt a mobile shelving system is the most cost effective way of increasing your storage capacity.

# Racking

## Sheet Rack

Sheet racks simplify the storage and access problems of all sheet material, panels and boards. Minimum base frame height makes loading very easy. It is recommended that the racks are secured to the floor (fixings not included). Supplied in knock down form.

Racks are powder coated in blue and have three storage divisions spaced nominally 155mm apart.

Product Description	H x W x D (mm)	Order Ref	Price (Each)
Sheet Rack	900 x 600 x 600	SR/0.6	£261.56

## Bar Rack

Heavy-duty horizontal bar racks are freestanding units for the storage of bars, pipes and tubes etc. End stops retain products in position. Pre-drilled for floor fixing (fixings not included). These units are powder coated in blue and require no bracing, therefore can be positioned as required.

Racks can be positioned back to back to provide double-sided units.

Maximum capacity per rack - 4000Kg

Description	H x W x D (mm)	Order Ref	Price
Bar Rack Single Unit	1840 x 840 x 890	BARU/SS	£465.00 (Each)
Bar Rack Double Unit (as shown above)	2 x Single Unit	BARU/SS/2	£930.00 (Per Pair)
