

Mezzanine Floors

Our mezzanine floors are manufactured to the highest quality and performance that comply with the latest British and European design standards.

Offering a fully comprehensive service from initial design and planning through to installation and commissioning, our mezzanine floors can help you maximise your building's capacity by taking advantage of unused vertical space.

Mezzanine floors can be a low cost option and are easily installed in almost every environment from a warehouse to a busy office.

Mezzanine Handrail Netting

This simple and easy to install safety netting prevents items from being accidentally kicked or dropped protecting personnel on the floor below. Available in several colours of fire retardant net and using the wire fixing system, mezzanine guard rail nets are easy to install and incredibly easy to maintain. The net is constructed from 3mm cord and a 45mm mesh size. Comes complete with wires and fixings.

- Prevents items falling from a mezzanine floor
- Retains the use of the handrail
- Available in a choice of six colours
- For new installations or can be retrofitted

The price below is a guide.
