

# Titan Partitions

Titan is a high-quality, two-line double skinned partitioning system ideal for clean room applications. Its versatility allows it to be used for a variety of other applications including laboratories, hospitals, surgeries, and food preparation, but particularly those applications where appearance is important.

Titan can be multi-tiered and profiled for warehouse and office divisions to create an environment more appropriate for specialised areas; Titan can also be manufactured in a form that can more readily withstand moist atmospheres.

Titan partitioning has a two-line junction to keep dust traps to a minimum and its powder-coated finish is an ideal surface for clean environments. It is completely demountable, enabling panels to be removed without having to dismantle the entire structure.

All hardware accessories come in stainless steel as standard due to its exceptional “clean” properties, and flush glazing eliminates ledges and further improves aesthetics.

All joints can be silicone sealed to stop air loss and reduce particle traps. Additional aesthetic features such as integrated blinds with movable magnetic controls can be provided upon request, and options for extra sound reduction are available. There are also options for several different floor details including coved skirting, bull nosed skirting, and stainless steel kick plates.

Used in conjunction with the correct air handling and HVAC systems, a Class-5 clean room can be achieved (ISO 14611-1).

Ceilings are formed from a single-line junction panel with an optional facility that enables the ceiling to carry a load of one person - ideal for maintenance purposes.

Integrated Blind with Control  
(Removable Magnetic Control available upon request)

Flush Glazing

Doors with Stainless Steel Fittings

## Elan Partitions

Elan is a high quality double-skin steel partitioning system for offices and warehouse factory applications where an attractive appearance is important. Panels are available in Full Steel and Steel/Glass combinations with double or single glazing.

Fully demountable, the panels can be supplied as fully fire-rated or non-fire rated. Additional noise reduction capabilities are available.

The Elan system can be supplied with a large range of ceilings (suspended or walk-on) and accessories. A wide variety of hinged and sliding doors are also available.

Elan and Sigma panels come in a wide range of sizes and heights allowing for multi-tiered configuration.

Both systems come in a variety of standard finishes (White RAL 9010. Sandstone BS08817. Grey BSDA005. Grey RAL 7037. Blue RAL 5010) and further non-standard, corporate and special finishes are available upon request.

Please contact us for a full quotation.

## Sigma Partitions

Sigma is a single-skin partitioning system suitable for factory, warehouse and storage requirements.

Fully demountable, it is ideal for enclosing work areas where appearance is important but without the cost of a double-skinned system. Sigma can also be used for machine guarding and for enclosing production lines, for perimeter guarding to automated machinery, robots, conveyors and with other automated processes. When used in a multi-tiered configuration it is effective for factory or warehouse division, providing additional security, dust-proofing and environmental control.

Sigma can be cut to accommodate existing structures providing an aesthetic finish. A variety of accessories such as drop-down hatches and framed openings can be created.

Sigma panels are available in full steel/glass, steel/mesh and all mesh combinations to suit your requirements, mesh can be provided in several styles and sizes. Furthermore a full range of hinged and sliding door options are available.
